

GRADUATE DATA SCIENTIST

SYNTHETIC / FICTIONAL JOB DESCRIPTION

NexaCore Technologies | Bengaluru / Hyderabad / Pune / Ahmedabad | Full-Time | 0–2 Years

ABOUT THE ROLE

NexaCore Technologies is looking for a motivated and analytical Graduate Data Scientist to join our growing Data and Artificial Intelligence organization. The successful candidate will work with cross-functional teams to support data-driven decision-making across multiple business functions. This role provides an opportunity to work on a broad range of analytical and machine-learning initiatives involving structured and semi-structured data. We are looking for candidates who demonstrate strong problem-solving abilities, curiosity, attention to detail, and a willingness to learn new technologies in a rapidly changing environment.

KEY RESPONSIBILITIES

- Work with large and diverse datasets to identify meaningful business patterns, trends, and opportunities.
- Collect, clean, transform, validate, and analyze data from multiple internal and external sources.
- Perform exploratory data analysis and communicate findings through clear visualizations and reports.
- Develop, test, and evaluate statistical and machine-learning models for business problems.
- Assist in selecting appropriate algorithms, features, evaluation techniques, and performance metrics.
- Build reusable analytical workflows and scripts using Python and SQL.
- Collaborate with data engineers, software engineers, product teams, analysts, and business stakeholders.
- Translate business questions and loosely defined requirements into analytical approaches and measurable outcomes.
- Support feature engineering, model experimentation, validation, and documentation.

MINIMUM QUALIFICATIONS

- Bachelor's degree in Computer Science, Information Technology, Statistics, Mathematics, Engineering, Data Science, or a related field.
- Strong programming experience in Python and working knowledge of SQL.
- Understanding of fundamental concepts in statistics, probability, and machine learning.
- Practical experience with data manipulation and analysis using libraries such as Pandas and NumPy.
- Familiarity with data visualization techniques and tools (Matplotlib, Seaborn).
- Understanding of supervised and unsupervised machine-learning concepts.
- Ability to work with relational databases and write analytical SQL queries.

PREFERRED QUALIFICATIONS

- Internship, academic, freelance, or project experience involving data science or analytics.
- Experience with Scikit-learn or similar machine-learning libraries.
- Familiarity with regression, classification, clustering, and model evaluation techniques.
- Experience with BI platforms such as Power BI or Tableau.
- Basic understanding of cloud platforms such as AWS, Azure, or Google Cloud.
- Familiarity with Git, GitHub, Docker, or similar development tools.

WHAT YOU WILL WORK ON

- Customer analytics, segmentation, and retention modeling.
- Recommendation systems, predictive modeling, and business intelligence.
- Exploratory analytics and forecasting across core business domains.

EQUAL OPPORTUNITY STATEMENT

NexaCore Technologies is committed to providing equal employment opportunities to all qualified candidates. Employment decisions are based on business requirements, qualifications, experience, and organizational needs.
