

SENIOR PYTHON BACKEND DEVELOPER

SYNTHETIC / FICTIONAL JOB DESCRIPTION

CloudScale Systems | Bengaluru / Remote | Full-Time | 2–5 Years

ABOUT THE ROLE

CloudScale Systems is seeking a talented Python Backend Developer to design, build, and scale our core SaaS platform APIs and distributed microservices. In this role, you will architect robust backend endpoints, manage high-concurrency relational and caching databases, and ensure our services maintain high uptime and security.

KEY RESPONSIBILITIES

- Design, implement, and maintain high-performance RESTful APIs and asynchronous services using Python and FastAPI or Django.
- Architect relational database schemas, write optimized SQL queries, and implement migrations in PostgreSQL.
- Integrate Redis caching, message brokers, and background task queues (Celery) to reduce latency.
- Containerize microservices with Docker and deploy them using CI/CD pipelines.
- Write comprehensive unit and integration tests using Pytest.
- Collaborate with frontend engineers, product managers, and DevOps teams to deliver resilient features.

MINIMUM QUALIFICATIONS

- Bachelor's degree in Computer Science, Software Engineering, or equivalent practical experience.
- 2+ years of professional backend software development experience with Python.
- Proficiency in modern Python web frameworks: FastAPI, Django, or Flask.
- Strong SQL knowledge and hands-on experience with PostgreSQL or MySQL.
- Experience with Docker containerization and Git version control.
- Understanding of REST API design, authentication (OAuth2, JWT), and web security best practices.

PREFERRED QUALIFICATIONS

- Experience with Redis for in-memory caching and session management.
- Hands-on experience deploying on cloud platforms (AWS EC2, S3, RDS).
- Familiarity with automated testing (Pytest) and CI/CD pipelines (GitHub Actions).
- Exposure to microservices architecture, gRPC, and asynchronous programming (asyncio).

EQUAL OPPORTUNITY STATEMENT

CloudScale Systems is an equal opportunity employer committed to diversity, equity, and inclusion in the workplace.
