

FRONTEND REACT DEVELOPER

SYNTHETIC / FICTIONAL JOB DESCRIPTION

PixelCraft Labs | Mumbai / Pune | Full-Time | 1–3 Years

ABOUT THE ROLE

PixelCraft Labs is looking for a creative and detail-oriented Frontend React Developer to build dynamic, responsive web interfaces for our design and digital analytics products. You will turn UI/UX wireframes into responsive web applications with high performance and accessibility.

KEY RESPONSIBILITIES

- Develop modern, responsive web applications using React.js, TypeScript, and modern JavaScript (ES6+).
- Build modular and reusable component libraries styled with Tailwind CSS and CSS3.
- Manage application state using Redux Toolkit, Context API, or Zustand.
- Integrate backend RESTful APIs and WebSocket endpoints.
- Implement client-side unit and integration tests using Jest and React Testing Library.
- Collaborate closely with UI/UX designers and backend developers in an Agile workflow.

MINIMUM QUALIFICATIONS

- Bachelor's degree in Computer Science, Software Engineering, or related technical field.
- 1+ years of experience developing responsive web applications using React.
- Proficiency in JavaScript (ES6+), TypeScript, HTML5, and modern CSS3.
- Experience with modern component styling (Tailwind CSS, Styled Components, or SASS).
- Familiarity with state management libraries (Redux, Redux Toolkit).
- Proficiency with Git version control and GitHub collaborative workflows.

PREFERRED QUALIFICATIONS

- Experience with Next.js framework for server-side rendering and static site generation.
- Knowledge of unit testing frameworks (Jest, React Testing Library, Cypress).
- Understanding of web performance optimization, lazy loading, and Core Web Vitals.
- Familiarity with Figma handoffs and design system architecture.

EQUAL OPPORTUNITY STATEMENT

PixelCraft Labs believes in building an inclusive workplace that embraces diverse perspectives and backgrounds.
