

JOHN DOE

SYNTHETIC / FICTIONAL RESUME

Ahmedabad, Gujarat, India | john.doe@example.com | +91 90000 00000 | linkedin.com/in/johndoe | github.com/johndoe

PROFESSIONAL SUMMARY

Data-focused engineering graduate with 1.5+ years of project and internship experience in Python, SQL, statistical analysis, machine learning, and business data analytics. Experienced in preparing structured datasets, building predictive models, creating analytical dashboards, and communicating findings to technical and non-technical stakeholders. Comfortable working across the data lifecycle, from data cleaning and exploratory analysis to model evaluation and reporting.

TECHNICAL SKILLS

Programming: Python, SQL, Java, Bash

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Feature Engineering

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Decision Trees, Random Forest, Model Evaluation, Cross-Validation

Statistics: Descriptive Statistics, Probability, Hypothesis Testing, Correlation, Confidence Intervals

Databases & BI: MySQL, PostgreSQL, MongoDB, Power BI, Tableau, Excel

Tools & Cloud: Jupyter Notebook, Git, GitHub, VS Code, Docker, Basic AWS (S3, EC2)

EXPERIENCE

Data Analytics Intern — InsightBridge Analytics Pvt. Ltd. | Jan 2025 – Jun 2025

- Cleaned and transformed customer transaction datasets containing over 500,000 records using Python and SQL.
- Performed exploratory data analysis to identify churn indicators, seasonal trends, and missing-value patterns.
- Developed customer segmentation models using K-Means clustering to optimize marketing campaigns.
- Created interactive Power BI dashboards to track customer retention, conversion rates, and revenue trends.

Machine Learning Intern — Nexora Technologies | Jul 2025 – Dec 2025

- Prepared datasets for machine-learning workflows using Pandas, NumPy, and Scikit-learn.
- Built classification models for customer churn prediction using Logistic Regression and Random Forest algorithms.
- Evaluated models using accuracy, precision, recall, F1-score, and ROC-AUC curves.
- Engineered automated SQL-based data extraction pipelines to create model-ready training datasets.

PROJECTS

Customer Churn Prediction System — Python, Pandas, Scikit-learn, SQL, Power BI

- Built an end-to-end churn prediction workflow achieving an F1-score of 0.81 on validation data.

Retail Sales Forecasting Analysis — Python, Pandas, NumPy, Matplotlib

- Analyzed two years of retail sales data to develop baseline forecasting models and seasonal sales projections.

EDUCATION

Bachelor of Engineering in Information Technology | Western India Institute of Technology | 2023 – 2027 | CGPA: 8.4 / 10

Relevant Coursework: Machine Learning, Data Mining, Probability and Statistics, DBMS, Data Structures, Cloud Computing

CERTIFICATIONS

- Google Advanced Data Analytics — Coursera
- IBM Data Science Professional Certificate
- SQL for Data Analysis — HackerRank
