

JOHN DOE

SYNTHETIC / FICTIONAL RESUME

Bengaluru, Karnataka, India | john.doe@example.com | +91 90000 00000 | linkedin.com/in/johndoe | github.com/johndoe

PROFESSIONAL SUMMARY

Backend Software Engineer with 2+ years of experience designing and implementing scalable web applications, REST APIs, and microservices using Python, FastAPI, Django, and PostgreSQL. Proficient in relational database schema design, Redis caching, Docker containerization, and automated unit testing with Pytest. Passionate about writing clean, maintainable, and high-performance server-side code.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, Bash

Backend Frameworks: FastAPI, Django, Django REST Framework, Flask

Databases & Caching: PostgreSQL, MySQL, Redis, SQLite

Architecture & Protocols: RESTful APIs, Microservices, AsyncIO, WebSockets, JWT Authentication, OAuth2

DevOps & Tools: Docker, Docker Compose, Git, GitHub Actions, Linux, Postman, Pytest, Celery

Cloud: Amazon Web Services (AWS EC2, S3, RDS)

EXPERIENCE

Backend Software Engineer — CloudCraft Solutions | Aug 2024 – Present

- Designed and deployed 15+ RESTful API endpoints using FastAPI and PostgreSQL, serving over 100,000 daily active requests.
- Implemented Redis caching layer for frequent database queries, reducing average API response latency by 45%.
- Structured database schemas with SQLAlchemy ORM and Alembic migrations, optimizing query execution with proper indexing.
- Built asynchronous background job workers using Celery and Redis to handle email notifications and PDF reporting.

Python Developer Intern — CoreStack Technologies | Jan 2024 – Jul 2024

- Developed backend modules in Django for an enterprise inventory tracking system.
- Integrated OAuth2 and JWT token-based authentication for secure user session management.
- Wrote comprehensive automated test suites using Pytest, maintaining over 85% test coverage across core services.

PROJECTS

High-Concurrency E-Commerce API — Python, FastAPI, PostgreSQL, Redis, Docker

- Engineered microservices backend handling catalog browsing, cart operations, order processing, and payment webhooks.

Task Scheduler and Notification Service — Python, Celery, Redis, Docker, AWS S3

- Built distributed cron task execution service capable of queuing and executing asynchronous batch tasks with retry policies.

EDUCATION

Bachelor of Technology in Computer Science & Engineering | National Institute of Technology | 2020 – 2024 | CGPA: 8.6 / 10

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Meta Back-End Developer Professional Certificate — Coursera
